LOOK RIGHT LOOK LEFT FOR TRAINS

Every time you're near railway tracks, be alert and always carefully look for trains – they can come at any time, from either direction.

No matter how you look for trains, be it a quick glance or a long distant stare, the important thing is that you do look, and you do look properly.

Whatever your look, look right, look left for trains.

Remember:

Only cross at pedestrian crossings or an overpass or underpass.

Stop and look for trains both ways up and down the tracks. Only cross if you are sure there are no trains in sight.

Obey the warning signs at the crossing – if lights are flashing or bells are ringing it means a train is approaching.

If a train has passed or is stationary at a station – always check both ways again to make sure another train is not coming. Two tracks might mean there is a second train.

If there is a pedestrian swing gate, wait until the gate opens fully before entering the crossing.
