# LOOK RIGHT LOOK LEFT FOR TRAINS

**Every time you're near railway tracks, be alert and always carefully look for trains – they can come at any time, from either direction.**

**No matter how you look for trains, be it a quick glance or a long distant stare, the important thing is that you do look, and you do look properly.**

**Whatever your look, look right, look left for trains.**

## **Remember:**

Only cross at pedestrian crossings or an overpass or underpass.

---

Stop and look for trains both ways up and down the tracks. Only cross if you are sure there are no trains in sight.

---

Obey the warning signs at the crossing – if lights are flashing or bells are ringing it means a train is approaching.

---

If a train has passed or is stationary at a station – always check both ways again to make sure another train is not coming. Two tracks might mean there is a second train.

---

If there is a pedestrian swing gate, wait until the gate opens fully before entering the crossing.

---
